

# Pressure transmitter

## For sanitary applications

### Model SA-11

WIKA data sheet PE 81.80

for further approvals  
see page 13

### Applications

- For gases, compressed air, vapour; liquid, pasty, powdery and crystallising media
- Ultra-pure steam systems for SIP
- Hydrostatic level measurement
- Vacuum monitoring, e.g. vacuum conveyors, pump monitoring
- Food and beverage industry, pharmaceutical industry, biotechnology, sanitary applications

### Special features

- Wide variety of aseptic process connections, for process temperatures up to 150 °C [302 °F]
- Diaphragm seal parts all welded
- Suitable for SIP and CIP
- Ingress protection up to IP68

### Description

The model SA-11 pressure transmitter is designed especially for the requirements of the food and beverage, pharmaceutical and biotechnology industries.

The instrument is particularly suitable for the special conditions of CIP/SIP cleaning processes, such as chemical stability towards cleaning liquids and high temperatures.

The flush diaphragm is directly welded to the process connection. This guarantees a crevice-free joint between the process connection and the measuring cell, additional sealings are not required.

For dead-space free instrumentation, aseptic process connections (clamp, threaded, VARINLINE® and NEUMO®) are available.

The model SA-11 conforms to the 3-A Sanitary Standard and is EHEDG-certified.

Pressure transmitter model SA-11 with  
TRI-CLAMP® connection

### Construction

A diaphragm made of 1.4435 stainless steel forms a flush separation of the process medium from the pressure transmitter.

The process pressure is transmitted hydrostatically from the diaphragm, via an FDA-approved system fill fluid, to a piezoresistive sensor.

The measuring range covers 0 ... 250 mbar up to 0 ... 25 bar.

The model SA-11 pressure transmitter is powered with a DC voltage of 10 (14) ... 30 V. As output signals, 4 ... 20 mA, 0 ... 20 mA or 0 ... 10 V are available.

A stainless steel case, with an ingress protection of up to IP68, offers a secure protection for external cleaning with splash water and enables its use in high-humidity environments. Through the integrated cooling element, process temperatures of up to 150 °C [302 °F] can be realised.

# Specifications

## Versions

## Installation example

Pressure transmitter model SA-11, with circular connector M12 x 1 and grooved union nut DIN 11864-1

The total height of the model SA-11 pressure transmitter includes the electrical connection, the transmitter case and the process connection

Accuracy specifications		
Non-linearity per BFSL (per IEC 61298-2)	≤ 0.2 % of span	
Accuracy <sup>1)</sup>	■ ≤ 0.5 % of span ■ ≤ 0.25 % of span	
Mean temperature coefficients at 0 ... 80 °C [32 ... 176 °F]		
Zero point	Measuring range 0 ... 0.6 bar to 0 ... 25 bar	≤ 0.2 % of span / 10 K
	Measuring range 0 ... 0.4 bar	≤ 0.25 % of span / 10 K
	Measuring range 0 ... 0.25 bar	≤ 0.4 % of span / 10 K
Span	≤ 0.2 % of span / 10 K	
Long-term stability (per DIN 16086)	≤ 0.2 % of span/year	
Adjustability of zero point, span	Adjustment is made using potentiometers inside the instrument. Not possible for IP68 cable outlet.	
Non-repeatability (per IEC 61298-2)	≤ 0.1 % of span	
Mounting position influence	Calibrated in vertical mounting position with process connection facing downwards.	

1) Including non-linearity, hysteresis, zero offset and end value deviation (corresponds to measured error per IEC 61298-2), calibrated in vertical mounting position with process connection facing downwards.

## WIKA-Cal calibration software

### Easy and fast creation of a high-quality calibration certificate

The WIKA-Cal calibration software is used for generating calibration certificates or logger protocols for pressure measuring instruments and is available as a demo version for a cost-free download.

A template helps the user and guides him through the creation process of a document.

In order to switch from the demo version to a full version of the respective template, a USB stick with the template must be purchased.

The pre-installed demo version automatically changes to the selected full version when the USB stick is inserted and remains available as long as the USB stick is connected to the computer.

- Creation of calibration certificates for mechanical and electronic pressure measuring instruments
- A calibration assistant guides you through the calibration
- Automatic generation of the calibration steps
- Generation of 3.1 certificates per DIN EN 10204
- Creation of logger protocols
- User-friendly interface
- Languages: German, English, Italian and more due with software updates

For further information see data sheet CT 95.10

Calibration certificates can be created with the Cal-Template and logger protocols can be created with the Log-Template.

#### Cal Demo

Generation of calibration certificates limited to 2 measuring points, with automatic initiation of pressures via a pressure controller.

#### Cal Light

Generation of calibration certificates with no limitations on measuring points, without automatic initiation of pressures via a pressure controller.

#### Log Demo

Creation of data logger test reports, limited to 5 measured values.

#### Log

Creation of data logger test reports without limiting the measured values.
